

Life Map

- You will be creating an outline or map of your life.
- Start with where you are born. You will be hitting significant events in your life. (ie. Births, moves, injuries, vacations, religious events, rights of passage, schools attended, etc.) Draw a quick sketch and write a few words that will help illustrate what happened.
- Once you get to the point where you are at today, circle it so we know where you are at today.
- Next project what you would like to happen in your future (College? Marriage? Kids? Travels? Etc.) and take it to the end of your life.
- You may refer to the example on the next slide to help you understand what I am asking for.
